## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 12, 2009, has been entered.

Claims 1-2, 4, 8-11, 14, 18, and 20 have been amended. Claims 21-25 have been added.

Claims 1-11 and 13-25 are pending.

### ***Specification***

2. The disclosure is objected to because of the following informalities: at page 11, lines 17 and 19, "pitch bells" has been misspelled.

Appropriate correction is required.

### ***Claim Objections***

3. Claim 4 is objected to because of the following informalities: "speed signal" should be "speech signal". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-11 and 13-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
6. Claims 1, 4, 11, 14, 18, and 20 recite the limitation "where an amplitude of the first harmonic is zero". A review of the specification fails to disclose or describe subject matter for the amplitude of the first harmonic is zero.

Claims 2-3, 5-10, 13, 15-17, 19, and 21-25 depend from either claim 1, 4, 11, 14, 18, or 20 and are similarly rejected.
